Gate Directory listing (online)	laketishomingo.com/forms/directorylisting.aspx
Entry Code Request (online)	laketishomingo.com/forms/entrycoderequest.aspx

Gate hours of operation

Starting Monday March 15, 2010 the gate will be closed 24/7. A property owner will need a gate card to enter the subdivision.

Obtaining a Gate Card

- Only a Lake Tish property owner can apply for a gate card. The card must be assigned to a vehicle owned by the property owner and will be issued in the property owner's name.
- Download the form at
www.laketishomingo.com/forms/gate_pass.pdf
Forms may also be obtained from the contacts listed above. Property owners may apply for up to six gate cards. For more than six cards, owners should apply to the LTPOA board.
- Only one gate card will be issued per vehicle. Gate cards are \$5 each to be paid when the gate card is issued.
- When the card owner sells his property the card will be deactivated. Therefore, if the seller gives his gate card to the new owner, the new owner MUST contact a person listed above to have the gate card information updated.

Using a Gate Card

Hold the gate card in front of the card reader (box to the right of the telephone call box) to open the gate.

24/7 -- In a Nutshell

Starting March 15, 2010 the gate will be closed 24 hours/day 7 days/week. It is the responsibility of the property owner to arrange for his visitors to get through the gate.

Do I have to provide entry to UPS delivery, school bus, trash pickup, and the postal carrier?

No. The LTPOA will make sure that these service providers are able to enter the subdivision.

For all other entries, property owners will be responsible for admitting visitors. Three methods are available for property owners to admit visitors: directory dial 9, entry code, and gate card.

How do I provide entry to a visitor when I am at home?

The visitor can use directory dial 9 to call you from the gate using the gate call box and ask to be admitted. When you answer the phone press "9" to open the gate. Make sure you have your phone number listed in the gate telephone directory. This can be a landline or cell phone number. Each property owner can have one directory listing.

How do I provide entry to a visitor when I'm away from home?

If you expect a delivery or service when you're not at home you can use the directory dial 9 to your cell phone, or obtain an entry code for the service provider. Entry codes must be obtained by the property owner. It's the responsibility of the property owner to give the code to the service provider. Another option, a guest gate card, is a good solution if you have a visitor who returns on a regular basis, like a health care provider or contractor.

Admitting Guests and Service Providers into the Subdivision

Three methods are available for property owners to admit visitors: directory dial 9, entry code, and gate card.

Directory Dial 9

Tell the visitor to call you from the gate using the gate call box and ask to be admitted. When you answer the phone, press "9" to open the gate. Make sure your phone number is listed in the gate telephone directory. This can be a landline or cell phone number. Each property owner can have one directory listing. Many local landlines also can be forwarded to cell phones. To be listed in the gate directory you must be a property owner.

To use the directory dial 9 . . .

At the entry gate telephone call box: if you know the 3-digit directory code, press # then enter the code, for example, enter #567. A call will be placed.

If you don't know the code, press # to display the first

page of the list. If the person you want to call is not on this page, press # for the next page until you locate the person you want to call. Then enter the 3-digit code next to their name. A call will be placed.

When the person answers, request them to press '9' on their phone's keypad to open the gate.

For '9' to open the gate realize that you MUST call the person using the gate call box. Calling a person on your cell phone and having them to press '9' will NOT work.

Entry Code

A property owner can obtain a entry code for a party, delivery, or service provider. Entry codes are 4-digit numbers and have an expiration date. There is no charge for an entry code. The property owner is responsible for giving out the code.

Party Code

If you are having a party and wish to arrange for guests to easily enter the subdivision, you may obtain a one-time entry code for your guests to use at the gate.

Delivery and Service Providers

Daytime entry codes may be obtained and used for deliveries and service providers like propane delivery or lawn service.

Entry codes are not intended to be used to admit visitors on a continuing basis.

To open the gate with the entry code . . .

Enter the 4-digit code via the keypad. If three wrong 4-digit codes in a row are entered, the gate call box will stop responding for three minutes. Do not press any keys other than the four digit keys! Do NOT press the '#' key. Do NOT post the 4-digit entry code on the telephone call box. If found posted, it will be removed.

Gate Card

A property owner can request a daytime gate card for a service provider. Daytime gate cards will have an expiration date. All gate cards are \$5 each. A daytime gate card, is a good solution if you have a service provider who returns on a regular basis, like a health-care provider or contractor.

Vehicles with trailers

The gate sometimes has trouble detecting a trailer behind a tow vehicle. This is especially true for a boat or pontoon trailer, which is relatively high and contains little metal. Heavier trailers should have no problem. The best way to bring a light boat trailer into the subdivision is to contact a member of the gate committee and arrange for the gate to be opened for you.
